The time period for reply, if any, is set in the attached communication.

Office Action Summary	Application No. 10/716,385	Applicant(s) SCHRAGA, STEVEN	
	Examiner Ryan J. Severson	Art Unit 3731	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

1. **Claims 2, 4 and 9 is rejected under 35 U.S.C. 102(b) as being anticipated by Turner et al. (4,817,603).** Turner et al. disclose a lancet device comprising a housing (82), a lancet (34), a biasing element (16) disposed between the lancet and the housing (see figures 6A-6C), a cocking seat (68) that is moveable with the lancet (to cock it, as in figures 6A and 6B), an engagement assembly including an engagement member (18 and 90) mounted on the lancet and a retention member (74, the weld or bond, see column 8, lines 29-36) disposed in moveable engagement with the engagement member, and a release element (88) disposed in releasing engagement with the engagement member to disengage the engagement member from the retention member. The cocking seat remains stationary relative to the housing after firing of the lancet (as in figure 6C). The release element is exteriorly actuated by pressing the cocking seat (see column 8, lines 42-45).

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. **Claims 11 and 12 are rejected under 35 U.S.C. 103(a) as being unpatentable over Turner et al. (4,817,603) in view of Czernecki et al. (5,356,420).** Turner et al. do not disclose a single use pivot interconnecting the engagement member to the lancet. Attention is drawn to Czernecki et al., who teach the use of breakable engagement members (11) that break to prevent reuse of the device. Therefore, it would have been obvious to one of ordinary skill in the art at the time the invention was made to have made the engagement member (portion 18) of Turner et al. a breakable single use pivot in the manner taught by Czernecki et al. to prevent reuse of the device. Such a combination would, upon firing of the spring, break the pivot points in the engagement member to release the lancet, instead of breaking the weld or bond between the engagement member and the cocking seat.

Response to Arguments

4. Applicant's arguments with respect to claims 2, 4, 9, 11 and 12 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

6. A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ryan J. Severson whose telephone number is (571) 272-3142. The examiner can normally be reached on Monday - Friday 8:30-5:00.
